8. The method of claim 1, further comprising saving the modified image as a modified source file on the remote computer.
9. The method of claim 8, further comprising:
determining whether the user has write access on the remote computer;
and
if the user is determined to have write access, saving the modified image as a modified image file on the remote computer.
10. The method of claim 1, further comprising giving the user the option to open the web page in the editing interface.
11. A computer-readable medium having stored thereon computer-executable instructions for performing the steps of claim 1.
12. A computer-readable medium having stored thereon computer-executable instructions for performing the steps of claim 6.
13. A computer-readable medium having stored thereon computer-executable instructions for performing the steps of claim 9.
14. A method of modifying an image on a web page, the method comprising:
downloading a mark-up language document defining the web page;
downloading a source file of the image, wherein the source file is referenced in the mark-up language document;
displaying the web page and the image on a user in a web-browser
interface according to the definition of the mark-up language document;
